"Today more than ever, we recognise the vital importance of our environment, and a healthy and viable planet. We are firmly committed to achieving our long-term goal of zero-impact cruise operations by 2050 and we are well advanced on this journey. At the same time as a company and an industry we are investing heavily in the accelerated development of environmental technologies and solutions that don't exist just yet to make these objectives achievable."

MSC W  RLD EUROPA

WORLD CLASS GENERATION SHIPS

Imagine the future of cruising, and discover it in the revolutionary MSC World Class fleet. Coming into service in 2022, MSC World Europa is the first ship in this trailblazing new generation.

The first major innovation in this pioneering new class of ships is the fuel they use.

MSC World Europa will be the first ship in the MSC Cruises fleet powered by Liquefied Natural Gas (LNG), one of the world's cleanest marine fuels at scale, and will also feature a series of other cutting-edge green technologies.

The technological breakthroughs are complemented by a truly groundbreaking design.

With their futuristic silhouette, signature plumb bow and Y-shaped aft, the ships in the MSC World class will look like nothing else at sea, cutting through the water with ease and grace.

To complete this revolution, we have also developed an immersive guest experience, so on MSC World Europa, guests can look forward to a holiday like no other.

It's a future class of emotions, for a new era of cruising.

MSC W  *RLD EUROPA*

WORLD CLASS FOR A BETTER WORLD

CONCEIVED WITH SUSTAINABILITY
AS OUR MAIN OBJECTIVE.

MSC World Europa is the most sustainable ship in our growing fleet, and sets a new standard for the entire cruise industry.

She is the first of our new ships to be propelled by LNG, currently the cleanest and most efficient fuel commercially available at the scale we need. This next-generation power source hugely reduces emissions, and marks a milestone on our journey to reach zero emissions operations.

Moreover, MSC World Europa is a tangible example of our long-term commitment to the environment and to local communities wherever we operate and beyond, a commitment embodied by the MSC Foundation.

THE FUTURE OF CRUISING.

LNG FUEL AND SOFC

MSC World Europa is the first ship in MSC Cruises' fleet to be powered by Liquefied Natural Gas (LNG), currently the cleanest and most efficient fuel commercially available at the scale we need reducing sulphur oxides (SOx) emissions by 99% and nitrogen oxides (NOx) emissions up to 85% while also helping to reduce CO₂ emissions by 25% compared to standard marine fuels. In addition, she will have a pioneering Solid Oxide Fuel Cell (SOFC) installed as a pilot for additional energy efficiency and CO₂ reductions.

SMART HEATING, VENTILATION AND AIR CONDITIONING SYSTEM

Heat recovery systems allows the intelligent redistribution of heat and cold from the laundry room and machinery spaces to warm up the swimming pools or other parts of the ship.

ANTI-FOULING PAINTS

The hulls of all MSC Cruises' ships are coated with special environmentally friendly paints which impede the growth of barnacles, algae and marine organisms to reduce drag significantly.

HYDRODYNAMICS

Optimised hull design and latest generation azipods and propellers.

LED LIGHTING

Energy efficient LED and fluorescent lighting is used throughout the ship.

SHORE-TO-SHIP POWER

Ready to connect to local power grid to reduce emissions whilst in port.

ADVANCED WASTEWATER TREATMENT

The system treats wastewater to a very high quality that is of a better standard than most shoreside municipal waste standards around the world.

BALLAST WATER TREATMENT SYSTEM

A system to avoid introducing invading species through ballast water.

TRIM OPTIMISATION

The monitoring of the ship's stability allows the crew to keep the vessel's trim optimised to reduce fuel consumption and optimise performance.

SELECTIVE CATALYTIC REDUCTION SYSTEM (SCR)

The SCR enables further reduction of NOx through active emissions control technology.

ADVANCED WASTE MANAGEMENT

Comprehensive systems to reduce, recycle and reuse all waste generated on board.

ENERGY-EFFICIENT*

28% less fuel and 255 kg less CO₂ per guest per cruise.

*compared to Fantasia Class ships

MAKING A CONCRETE DIFFERENCE FOR PEOPLE AND THE PLANET.

The MSC Foundation is an independent non-profit organization established to lead, focus and advance the MSC Group's conservation and humanitarian commitments. MSC's long nautical heritage and passion for the sea drives us to prioritise the wellbeing of the environment and communities wherever we operate and beyond.

SUPER CORAL PROGRAMME

The MSC Foundation works in 4 core focus areas worldwide: environmental protection and conservation, support for the most vulnerable communities, quality inclusive education and emergency relief for populations in crisis situations, including disasters.

Our pioneering Super Coral Programme on and around Ocean Cay is partnering with leading universities and marine experts to develop hardy “super corals” that are more resistant to global heating and pollution, together with a model for outplanting them to restore coral reef ecosystems sustainably and protect the livelihoods of millions of people around the world.

A DESIGN THAT'S OUT OF THIS WORLD

UNLIKE ANYTHING ELSE AT SEA
BOTH OUTSIDE AND ON EVERY DECK.

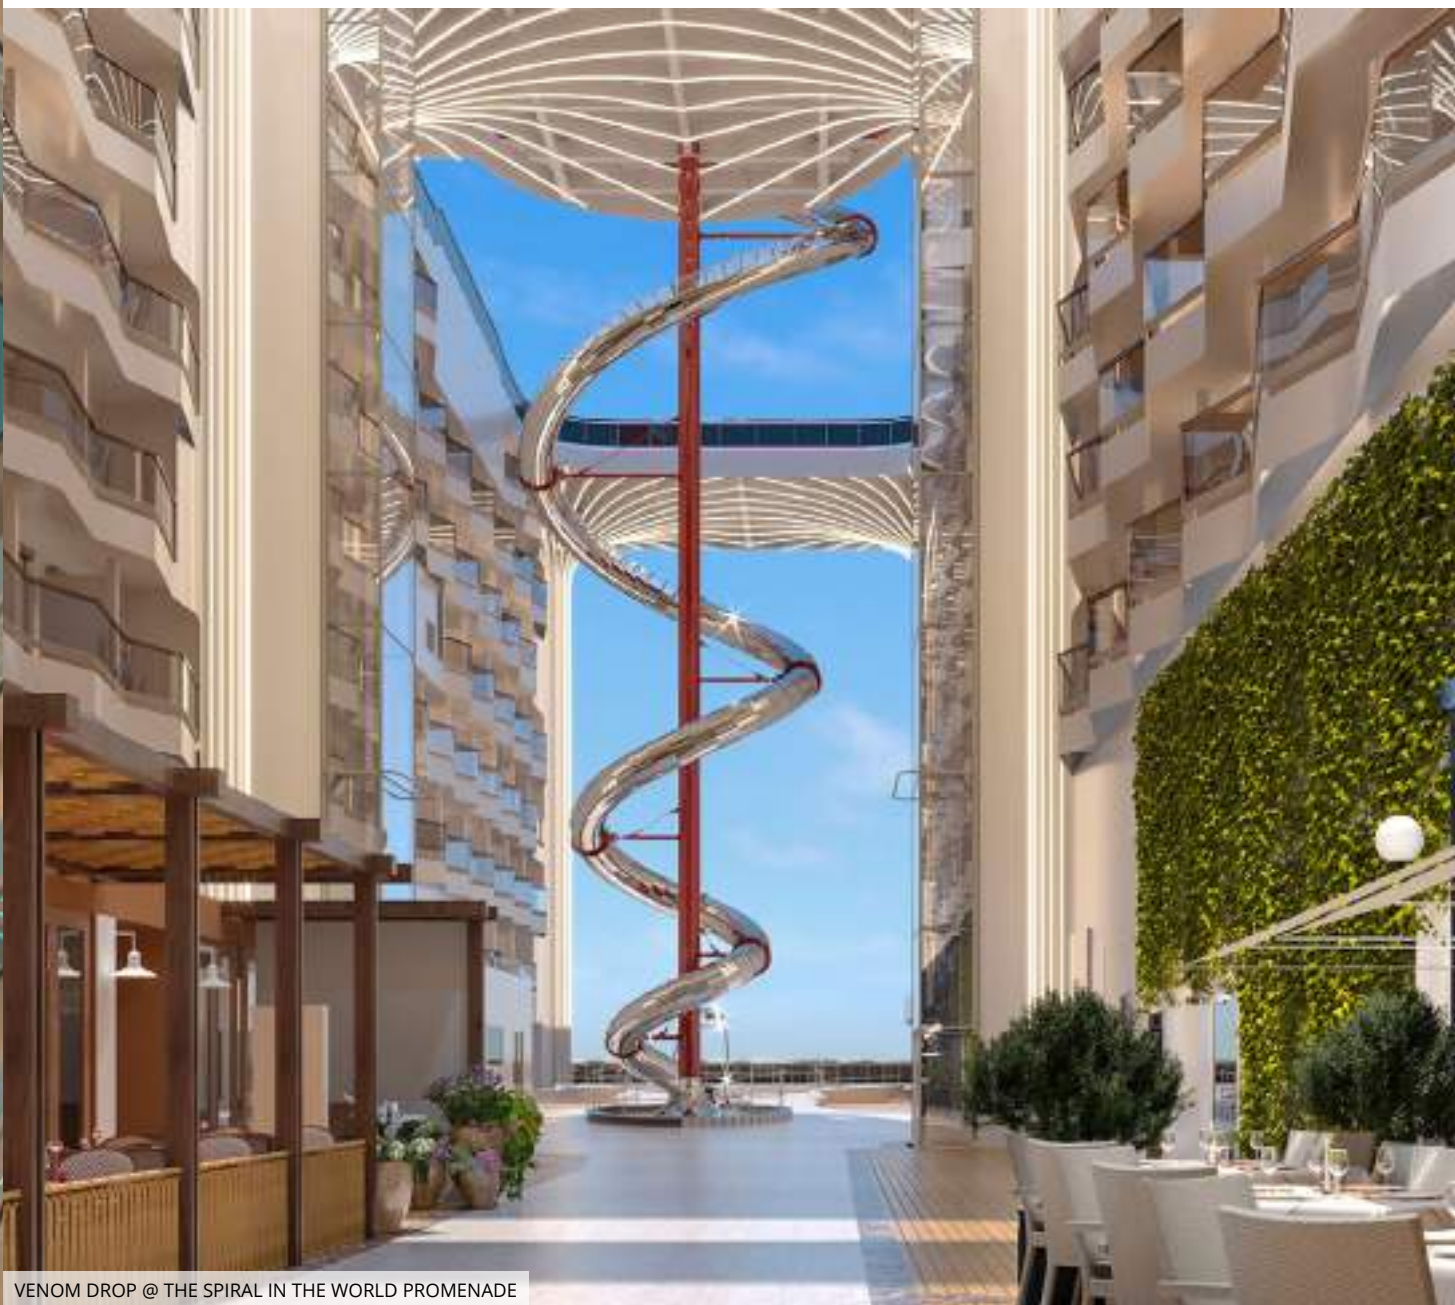

Shaped with a vertical bow that slices clean through the water, MSC World Europa cuts a striking, ultramodern figure. Her Y-shaped aft opens onto an impressive 104-metre-long outdoor promenade dominated by a spiralling 11-deck-high architectural dry slide.

The breakthroughs in design inside the ship are equally original. Conceived as a series of completely distinct areas, the interiors offer a world of different experiences for all ages. On every deck, guests will discover a series of visually stunning venues and innovative design features, for a cruise experience built on dazzling style and creative flair..

INCREDIBLE INNOVATIONS FOR EVEN GREATER COMFORT.

The ship's beautiful design features also enhance guests' experience: the plumb bow maximises comfort, the Y-shaped aft greatly increases the number of balcony cabins, and the Venom Drop @ The Spiral dry slide gives guests a fast and fun way to reach the lower decks.

Destined to become one of the most photographed features on the ship, it is a sleek, stainless steel dry slide that with its 74,6 meter length is the longest anywhere at sea.

VENOM DROP @ THE SPIRAL IN THE WORLD PROMENADE

WORLD GALLERIA

The innovations continue in the **indoor World Galleria and outdoor World Promenade**, which provide an original space for all kinds of entertainment, while also serving as a hub for a wide variety of eating, drinking and shopping venues. In the World Galleria chic boutiques, guests will find their favourite brands.

When the sun sets, further aspects of the ship's innovative design come to life. Stunning visual shows illuminate the huge **LED dome**, forming a sensational backdrop for concerts, discos and parties. In fact, there's always something beautiful to do in the World Galleria, under a spectacular digital sky.
