SMALL-SHIP EXPEDITIONS

# The Aurora Expeditions Difference

From the start, Aurora Expeditions was destined to be different. Our passion for adventure, exploring wild places and sharing the experience with friends burns just as brightly as it did more than 32 years ago, as does our preference for small-group, personal expeditions.

You might have noticed that we do not call it a cruise, but experiential travel. With a maximum of 132 passengers, our purpose-built small-ship expeditions are accompanied by an expedition team we believe is the world's best.

Discover the pristine panoramas, the magnificent fjords, abundant wildlife, culture and history making each expedition action-packed, and immersive.

The real adventure happens off-ship. Our expeditions are all about providing more

opportunities for you to get off-ship, explore and connect with the remote destinations we visit.

For us, it's all about connecting you with the natural environment because when you disembark, we want you to be richer in your knowledge and understanding of our planet than you were when you stepped onboard.

Responsible travel is at the heart of our ethos. We travel to make a positive impact on the planet and are passionate about supporting and protecting people, communities, the places we visit, the extraordinary wildlife we encounter and the nature we connect with.

If you are ready for your own adventure, join us for a life-changing Arctic journey.

# Sustainability In Action

We have an ongoing commitment to responsible and respectful travel. Aurora Expeditions was one of the first operators to become an IAATO and AECO member, and we take our responsibility seriously. We are curious, we are passionate. We care about reducing our footprint environmentally. We are taking real actions for the care of the planet. We are doing MORE to help make a positive impact on the planet.

Association of  
Arctic Expedition Cruise  
Operators **AECO**

## Our Planet - Minimal Footprint

- 100% Climate Neutral
- X-BOW® Reduced fuel consumption
- Responsible travel ashore; care for the places we visit

## Education & Enrichment

- Participative Citizen Science Program
- Women in Conservation Program
- Creating ambassadors for the planet

## People & Community

- A team of diverse, motivated people
- Volunteering for the environment
  - Forming partnerships

## Environmental Management Systems

- Efficient energy, water and waste management
  - Reduced single-use plastics
- Eco-friendly products and cleaning onboard
  - Eco-friendly supplies in head-office

# Citizen Science

Travel is always the best educator, and we offer the chance to enrich your curiosity and expand your knowledge and understanding of the places we travel to. There is no better learning opportunity than being in the field with subject matter experts.

Our Citizen Science Program is designed to be an interactive forum of like-minded travellers to share new discoveries and deepen their connection to the natural world in a relaxed, informal and fun environment – both on board our ships, on our fascinating shore expeditions and in our Zodiacs.

You can make a difference, as we can provide invaluable data to the scientific community through your participation. You too can become an ambassador for the protection of our majestic but fragile blue planet when you return home by sharing what you have learned.

## Our Projects

Our seven dynamic and diverse Citizen Science Projects\* – focusing on whales, seabirds, microplastics, weather patterns, phytoplankton, polar fjordlands and marine biodiversity – have been hand-picked for their ground-breaking work and global achievements:

Whale

Seabird

Microplastic

Weather Patterns

Polar Fjordlands

Phytoplankton

Marine Biodiversity

View our  
Impact Report

\*Citizen Science projects are location and weather dependent and not all projects are able to be operated on every voyage.

# Why Travel to the Arctic

Adventure and exploration is all about getting out and maximising your experience. The Arctic is mysterious, exciting and memorable and here are some reasons why:

## Landscapes

The Arctic offers some of the most magical landscapes that will surprise you. Experience endless multi-hued horizons, the jaw-dropping tundra, with lightly covered snow and ice and wildflowers in the Summer – simply awe-inspiring. Explore the jagged icebergs, some of the world's largest fjords, glaciers and snowcapped mountains with some of the most magnificent wilderness landscapes our planet offers.

## Geology

The Arctic has an active geological past. Volcanic activity in Bering Land Bridge National Preserve can be traced back as far as 26-28 million years and as recent as 1,000 years ago. Volcanic ash deposits help preserve intact, frozen remnants of Ice Age tundra from the time of the land bridge. These volcanoes have left their mark on the landscape, including the largest maar lakes in the world. This interaction of volcanic activity in a permafrost-dominated landscape is unique to the Arctic.

## Fjords

When you reach the region's fjords you will be mesmerised. Sailing through areas of such stunning natural beauty translates into pinch-me moments, with gratitude replacing language at everything witnessed.

Cruising the Arctic's canyon-like waterways reveals sheer cliffs and a wealth of flora and fauna. Whether it's a breaching whale, a rare Arctic seabird, or a range of land mammals peering from the cliffside, it's an ever-shifting landscape filled with surprises.

Svalbard's fjords are breathtaking, not only for their dramatic scenery but because of the plethora of wildlife, thanks to Svalbard's protected status.

To journey to the world's largest fjords, head to Greenland's Scoresbysund. This colossal network of fjords extends 38,000 km<sup>2</sup> (14,700 miles<sup>2</sup>) and reaches depths of 1,450 metres (4,760 feet) in some areas.

## Arctic Tundras

Not many people get to visit an Arctic tundra in their lifetime. Tundras feature barren land and are home to flora and fauna robust enough to survive the planet's coldest, harshest climates. Covered in permafrost and snow for most of the year, the treeless plains of the tundra burst to life with wildflowers in the summer months. This draws musk ox, reindeer, Arctic fox and hares, and passing migratory birds, like falcons, snow buntings, and loons.

## Land of the Midnight Sun

During summer, you will experience 24 hours of daylight, known as the "Midnight Sun", and experienced anywhere north of the Arctic Circle. Witness how the sun illuminates the majestic fjords, glaciers and spectacular landscapes, providing opportunities to enjoy the natural beauty of the Arctic, day and night – from wildlife sightings to amazing photography.

## Explorers

Follow in the footsteps of some of the most famous explorers in history. Experience well preserved cabins and encampments used by early explorers and hunters in the 20th century, as well as historical sites such as graves of the tragic Franklin expedition in 1845-45 on Beechey Island.

## Arctic Communities

The Arctic is home to almost four million people today – Indigenous Peoples, more recent arrivals, hunters and herders living on the land and city dwellers. Roughly 10 percent of the inhabitants are Indigenous and many of their peoples distinct to the Arctic. They continue their traditional activities in the context of an ever-changing world. Yet, as the Arctic environment changes, so do livelihoods, cultures, traditions, languages and identities of Indigenous Peoples and other communities.

# Iconic Wildlife

The Arctic is one of the most diverse and fascinating places where you can explore the raw beauty, and an abundance of wildlife in its natural habitat, ranging from the elusive polar bears to musk oxen, Arctic foxes, reindeer, Arctic hares, orcas, whales and numerous seabird species. As summer unfolds, the landscapes and wildlife begin to come to life and you have the chance to witness these curious creatures in their natural realm.

## Polar Bear

Polar bears spend most of their time on ice floes in the northern Arctic. They're the largest land carnivore in the world. The adult female stands 2 m tall and weighs around 150-300 kg; males stand 2.6 m and weigh up to 700 kg. Their fur is, in fact, translucent, with black skin. Defining characteristics include - incredible swimming abilities, with polar bears swimming around 80 km from land or ice floe.

## Musk Oxen

Historically, musk oxen have been associated with hunting cultures of early mankind. Their meat and hides were used for food, clothing, and shelter, while the horns and bones were carved to make tools and crafts. The long, thick coat makes them look larger than they really are. Male musk oxen - bulls, weigh between 181 - 409 kg, while females - cows, weigh between 259 - 227 kg.

## Arctic Foxes

Arctic foxes (also known as polar fox, white fox or snow fox) are true animals of the far north, living their whole lives above the northern tree line in the Arctic tundra. They have thick, luscious fur, allowing them to survive temperatures up to -50 degrees Celsius. Even the bottoms of their paws have fur and their short legs, muzzles, and rounded ears – reducing the surface area on their bodies to prevent heat loss.

## Arctic Hares

The Arctic hare is a species of hare highly adapted to living in the Arctic tundra and other icy biomes. The Arctic hare survives with shortened ears and limbs, a small nose, fat that makes up close to 20 per cent of its body, and a thick coat of fur. They have a number of anatomical, behavioural and physiological adaptations allowing them to survive in an extreme climate successfully.

## Reindeer

Reindeer are built for the cold! They have hollow hair that traps air to remain well insulated. Their noses are designed to warm the air they breathe before it reaches their lungs. During winter, the hair on their face grows long down to their mouth, protecting their muzzle while grazing in the snow. When the temperature is extremely cold, reindeer can lower their body temperature in extremities to just above freezing, helping them avoid losing body heat.

## Whales

Many whales are not truly residents of the Arctic but visit the Arctic during the summer to forage and take advantage of the highly productive waters. Only the bowhead and beluga whales are year-round residents of the Arctic. However, many other species such as orcas, humpback and sperm whales are commonly found in these waters.

## Seals

The Arctic is home to several unique and beautiful seal species: ribbon seals, bearded seals, ringed seals, spotted seals, harp seals, and hooded seals. These species are called ice seals because they spend the bulk of their lives on or near sea ice. Seals are essential members of their ecosystems, both as predators of fish, squid, shellfish, seabirds, and other marine life and as prey for hunters like polar bears, orcas, and sharks.

## Orcas

Orcas are highly intelligent and able to coordinate hunting tactics. Female orcas are thought to live to 80 years of age or more. Orcas linger longer in the Arctic Ocean, as sea ice there shrinks. The whales often travel to access varieties of prey, but it's likely there are now more hunting opportunities in the Arctic.

## Birdlife

Around a dozen bird species can live in the Arctic all year round: the gyrfalcon, raven, ptarmigan (rock, willow & Svalbard species), snowy owl, redpolls (common & hoary), two gulls (Ross's & ivory), three guillemots (common, black, & Brunnich's), and the little auk. Even for these hardiest of species, most will migrate to southern parts of the Arctic during the harshest winter. All other species (about 100 that nest in the Arctic) migrate relatively long distances to escape the Arctic winter.

## Walrus

The largest pinniped marine mammal in the Arctic. Its distinctive tusks are used as levers to move its heavy body on land, and as weapons. They are recognised for their large tusks. Male's tusks are usually longer and heavier than females, and males are three to four times larger than females. Walrus are social and haul out in herds of up to thousands of individuals. During the non-breeding season, the groups are sexually segregated, and dominance is based on body and tusk size.

# Moments of Adventure and Discovery

Explore beyond your imagination and experience some of the most exhilarating adventures in remote destinations. Ignite your curiosity, passion and care for the natural world and discover incredible moments with Aurora Expeditions.

## Expert Guides

Our world-class Expedition Team are all about supporting our expeditioners as they embark on the adventure of a lifetime, where you'll travel alongside the most dedicated, experienced, passionate, and skilled Expedition Team in the industry. Our team's knowledge of the destinations we visit is unparalleled, as they encourage you to push your boundaries and explore some of the most breathtaking locations on the planet. With our small group approach to big adventures, we offer a high ratio of Expedition Team to passengers of 1:8, and safety is always our top priority.

## Comprehensive Activities

Spend more time off-ship on our expeditions, with smaller groups and an unrivalled array of activities meaning passengers can enjoy more excursions and immersive, active adventures, no matter their level of fitness or experience.

Activities can include Zodiac cruising, guided hikes, polar plunge, photography, as well as optional\* activities such as sea kayaking, scuba diving, paddling and rock climbing (Greenland only).

We have the most comprehensive activity program, supported by the most experienced Expedition Team in the industry, dedicated to making each experience action packed and immersive.

## Photography

There is no better way to bring your adventures to life than the moments you capture yourself. Our award-winning professional photographers are onboard every voyage to inspire, guide and assist you in creating these memorable moments. Every passenger, from smartphone user to semi-professional shooter, can benefit from our experts' deep professional knowledge – picking up tips, learning new skills and taking some awe-inspiring photos for lifelong memories.

Every voyage with Aurora Expeditions provides countless extraordinary opportunities to capture unforgettable moments in the Arctic like a professional.

## Special Guests

With education and enrichment at the heart of the way we explore, our Special Guests Program features an array of experts in the fields of exploration, conservation, science, photography, art, culture and more to enrich your expedition with their unique perspectives, insights, and experiences.

We want you to be inspired and connect more deeply to the places you visit, wildlife you encounter, and people on your expedition and which is why we carefully match our inspiring and educational Special Guests from around the world with voyages where they can share their expertise and passion with you.

Richard l'Anson

## Purpose-Built, New Small-Ships

Our two ships the *Greg Mortimer* and the *Sylvia Earle* are purpose-built for small ship expeditions to the most remote places on earth. Featuring the revolutionary ULSTEIN X-BOW® allowing us to cross oceans more comfortably, our ships also offer expansive observation decks, inviting communal areas and unsurpassed environmental credentials; the perfect base camp for adventures at the outer limits of human exploration. Accommodating a maximum of 132 passenger per voyage with nearly all cabins featuring balconies, our fleet is redefining expedition cruising for the future.

\*All our landings, adventures and activities are subject to weather conditions and activity options do vary by itinerary. Optional activities at additional cost and must be pre-booked.

# Choose Your Arctic Adventure

The Arctic sweeps across the top of the globe and touches eight countries. Discover a destination full of adventure and exploration at every turn, whether you're in search of abundant wildlife, majestic landscapes and icescapes of the Arctic, or the inspiring history and culture of the far North.

From the incomparable glaciers of Greenland to the captivating geology of Svalbard, home of the polar bear or following in the footsteps of the early explorers and indigenous people of the Northwest Passage, the Arctic offers unparalleled encounters with the natural world at its most rugged and wild.

*"A brilliant holiday - seeing the iconic polar bear, walrus, seals, a blue whale and scenery that you need to drink in as photos do not do it justice. It is difficult to imagine the beauty of what could be sculpted icebergs - still smiling!"*

— L Payne, 2022

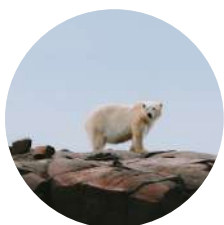

# Svalbard

If you're a traveller seeking adventure and exploration, Svalbard is the ultimate destination for you. This Norwegian archipelago nestled in the High Arctic is a breathtaking wilderness that boasts dramatic fjords, rugged mountain ranges, and a fossil-rich polar desert. From world-class wildlife viewing to fascinating historical sites, Svalbard has plenty of things to offer to travellers with diverse interests. The landscape is nothing short of incredible, with everything from tidewater glaciers to mountain ranges, flowering tundra to polar deserts, and huge ice sheets. Svalbard is one of the best places in the world for nature photography, and if you're an active traveller, there are even more opportunities for you, including sea kayaking, scuba diving, walks, and hikes. Whether it's your first trip to the polar regions or you're a seasoned explorer, Svalbard offers something for everyone. With its accessibility and wide range of activities, planning a fantastic trip to Svalbard has never been easier.

## Highlights

# Greenland

Greenland is a remarkable destination that offers awe-inspiring natural beauty and experiences that can be hard to put into words. Whether you're exploring the East, West or South, our Greenland Expeditions reveal the beauty of the world's largest island.

Discover one of the planet's last great wildernesses, a remote land of ice and snow. Offering remarkable landscapes, unique wildlife, iceberg-filled fjords, majestic peaks, and vast tundra. Go further and experience Viking history, cultures and encounters with Inuit communities that thrive in these extreme conditions. Greenland is truly unlike anywhere else in the world. The fjords and mountains are where life is concentrated. Summer is the best time to visit Greenland – when wildflowers are in full bloom, birds start breeding and wildlife sightings are most common.

Discover this fascinating country's hidden secrets as you traverse its waters and embark on unforgettable adventures.

## Highlights

Wildlife

Ilulissat Icefjord

Activities

Scoresbysund

Inuit Culture

# Northwest Passage

Discover vertiginous cliffs of seabirds, whales and polar bears, and austere ice-shattered landscapes home to resilient Inuit communities. It's an adventure charged with the palpable presence of long-lost souls of expeditions past who forged the Northwest Passage across Arctic Canada.

Enjoy the spectacular backdrop of this natural landscape, taking in the view of ever-changing epic scenery, whether transiting through the narrow squeeze of Bellot Strait or marvelling at the blue-tinted sea ice choking Dundas Harbour. The extremity of these landscapes also creates a profound respect for the Inuit communities, whose culture lives in such a testing environment.

Discover Beechey Island, a historic site for brave adventurers who tried to create a trade route between the Pacific and Atlantic Oceans in the 19th century. Beechey Island is known for its connection to the ill-fated Sir John Franklin expedition, which resulted in the loss of all lives on board. Standing on the island is a haunting experience.

\*Terms & Conditions apply: Valid on select ship voyages only. Advertised from pricing is per person twin share, inclusive of savings on the advertised cabin category and based on Australian dollars for Arctic voyages and US dollars for Antarctica voyages. Prices are correct as of 19 September 2023, subject to availability at the time of booking. The offer is valid on new bookings only aboard the *Greg Mortimer* or the *Sylvia Earle* which must be booked and deposited by 31 October 2023. Promotion is subject to availability at the time of booking and capacity controlled. The promotion is not combinable with other offers, except for Loyalty offer. +The save up to pricing for Arctic voyages is based on Captain Suite for Svalbard Odyssey; Arctic Complete; Iceland, Jan Mayen, Svalbard; Northern Lights Explorer; and Northwest Passage voyages and Junior Suite for Svalbard in Depth; Jewels of the Arctic; Greenland Odyssey; Across the Arctic Circle and Complete Northwest Passage voyages. The save up to pricing for Antarctic voyages are based on Captain Suite for Spirit of Antarctica; Deep Weddell following Nordenskjöld and Falklands, South Georgia & Antarctic Peninsula voyages. ^Pay No Solo Supplement: for a single-person booking (usual solo supplement is 50%). Valid on select Antarctica 2023/24 and Arctic & Global 2024 voyages. Eligible on all cabin types EXCLUDING Captain's Suite, Junior Suites or Triple share cabins. This offer is not combinable with any other discounts (except Loyalty & in-market saving of up to 20% off). ~Air Credit: applicable on all Antarctica 2023/24, Arctic & Global 2024 voyages. Air credit of US\$2,000 pp for Antarctica expeditions and AU\$3,000 pp for Arctic & Global expeditions will be applied to booking as a discounted amount; airfares must be booked independently. The offer is not combinable with No Solo Supplement offer and is available until sold out. >The 20% saving applicable to Arctic Complete voyage ACC008G only. The promotion can be withdrawn at any time and is not redeemable for cash. Normal booking terms and conditions apply. To confirm your booking, a completed booking form and a non-refundable deposit of \$2,500 pp in the booking currency is required within 7 days of reserved berth/s. Additional terms and conditions may apply. Please see full [auroraexpeditions.com.au/terms](https://auroraexpeditions.com.au/terms)
