

Sylvia Earle Ship information

Our second new purpose-built small ship expedition vessel honours the highly accomplished marine biologist, oceanographer and explorer, Dr. Sylvia Earle. As the first woman to become chief scientist of the U.S. National Oceanic and Atmospheric Administration, and named by Time Magazine as its first "Hero for the Planet" in 1998 – this vessel pays tribute to Dr. Earle's long-standing conservation efforts for marine protected areas and ocean wildlife.

Like the *Greg Mortimer* ship, the *Sylvia Earle* also features the revolutionary Ulstein X-Bow® for faster, smoother sailing and contains a unique glass atrium lounge inside the bow for stunning panoramic views. The ship also features a jacuzzi, where you can admire impressive scenery while watching the world go by from the top deck.

Ship Features

- Highly qualified and experienced expedition team and international crew.
- The Ulstein X-BOW® hull allows the ship to pierce through waves to maintain speed of travel thus offering faster, more comfortable travel, lower fuel consumption and reduced emissions.
- All staterooms feature twin or king bedding configuration and private bathrooms. 97% of staterooms include a private balcony. Over 20 interconnecting Balcony Staterooms. 60% of staterooms can accommodate a third person (triple share on request).
- Observation lounge and viewing platforms offer spectacular panoramic views of scenery and wildlife.
- Purpose-built activity preparation areas including four Zodiac-launching platforms for fast and safe transition off the ship as you embark on multiple daily excursions.
- State-of-the-art lecture theatre, science centre and library. In between landings, enjoy our jacuzzis or experience our wellness centre, gym & sauna.
- With huge windows and superb views to the front of the ship, the library or the atrium lounge is the perfect place to sit with a drink and watch for wildlife or admire impressive scenery.
- Starlink Wi-Fi - Free

Ship Specifications
